### How to cite this retraction

Salman A, Islam S, Saleh M, et al. (May 27, 2021) Retraction: Nutritional and Biochemical Parameters Among Multiple Sclerosis Patients: A Case-Control Study. Cureus 13(5): r31. doi:10.7759/cureus.r31

## Retraction Notice

This article has been retracted due to allegations that the study data was plagiarized from an already-published article in Neurology India: <https://www.neurologyindia.com/article.asp?issn=0028-3886;year=2020;volume=68;issue=4;spage=867;epage=874;aulast=Akbay>

After conducting our own investigation, Cureus has made the decision to formally retract this article.

A key condition of article submission is that authors must explicitly declare that their work is original and has not appeared in publication elsewhere. Re-use of any data must be appropriately cited. As such this article represents a severe abuse of the scientific publishing system. The Cureus Journal of Medical Science takes a very strong view on this matter and we apologize that this was not detected during the submission process.
